

## AcuFlow (formerly Hydroflo) Customer Reference List

Hydroflo was founded in 1972 with the idea of making an improved design of metering pumps that will last longer with a more accurate and reliable performance than any other pump on the market. Since then, these pumps have been used in many industries and applications to quickly establish a reputation for durable and dependable quality. In 2007, AcuFlow acquired the pump line and relocated to a state of the art facility in Irvine, California, where the complete range of pumps is manufactured today.

In the last 37 years, Hydroflo and now AcuFlow pumps have been applied in various industries and markets successfully. Following is a partial list of some of the more prominent AcuFlow pump users:
